BLADE
Powerbank

Thanks for choosing our power bank. Please read the whole instruction booklet to ensure the best possible use of your product. Only use the included cables. Depending on the charging station, hissing could be heard for a short time at the start of the charging process. After not using the powerbank for a longer time the battery can be fully discharged. In this case, there can be a delay until the charging LED is flashing. The powerbank needs a couple of hours until it is fully charged, depending on your power supply.

Product specification

1. Built-In battery:
The capacity of the 3,7V lithium-ion-battery is 4.000 mAh.
The remaining battery charge is shown by 3 LEDs next to the power button.
You can charge a device using the USB port (1A).
Most Apple and Android devices like tablets and mobile phones can be charged using the BLADE powerbank.
Please note that the charging speed can be decreased if your screen is turned on.
We suggest not using your devices while charging it.

Instructions

You can use the included USB-cable to charge your powerbank using a PC or another 5V USB power supply.
Use the Micro-USB "IN" port to plug in your charging cable.
The powerbank has one USB port.
You can charge devices like mobile phones or tablets.
